Enterprises

URC INFOTEC
beyond impossible...

Empowering
the enterprise

A smart business does more with less. Smart business leaders understand that the investment payoff in technology is significant in terms of profits, efficacy of operation, forward thinking leadership in the field and more. So, partnering with the right technology vendor becomes a critical decision. Our systems and solutions aim at empowering the enterprise. As an Enterprise Systems and Solutions (ESS) provider, URC Infotec empowers its clients by providing relevant and effective technologies they need to adopt.

URC Infotec, believe that we play a key role by advising our clients on the relevance and effectiveness of the information / communication technologies

URC Infotec (URCI) is a team of young and energetic techno-entrepreneurs, engaged in designing, developing and deploying Enterprise Systems and Solutions (ESS), both as products and services. Driven by innovative ideas, we have been able to build and offer highly customized and customizable ESS to help enterprises efficiently manage their resources. We offer proven advantages to our customers in terms of cost, time, and quality through indigenous techniques and special tools. Integration of proper processes and technologies deliver added values to our clients.

Initially founded as a software development centre in Chennai, India, URCI has evolved into a dominant player in the industry. Our solutions, products, and supportive services spanning across a number of industries/sectors, are based on our collective knowledge, experience, and expertise in domains and technologies.

URC Infotec's ESS solution addresses the needs of five different verticals - Construction, Healthcare, Pharmaceuticals and Manufacturing (SME). We also design, develop, and deploy solutions/services in areas like Business Intelligence, Web Design/Development, Information Systems Security and Audit. Through our tie-ups in Malaysia, Middle East, Saudi Arabia, Europe and the USA, we promote our products and services globally.

About
URC Infotec

01. CONSTRUCTION

Organizations engaged in construction business, with multiple locations and projects sites find CIMS appropriately fitting into their systems, making it adoptable and affordable. Within 15 months of its introduction into the market, six clients who are using it have recorded benefits in terms of productivity, which is a testimony to our product quality. We are constantly upgrading the capabilities of CIMS. Some of these relate to adopting 'Open Source Standards' (thus freeing clients from costlier proprietary options), adding more core modules like 'Engineering' (for companies in EPC category), and providing pure web-interface.

02. HEALTHCARE

Our healthcare solutions cater to organizations engaged in delivering healthcare services through hospitals and clinics. While back office modules like Accounting, Finance, Assets, HR, and Maintenance support batch-processed analytics and reporting, core modules like Patient Admission, Diagnostics, Treatment, Discharge and Pharmacy help these hospitals and clinics manage their day-to-day tasks online 24x7.

03. SMB(Small & Medium Business)

ERP systems for small and medium business enterprises developed by URC Infotec are custom made solutions and offered at affordable prices. These are easy to implement and help optimize the business operations as desired by the customer.

KNOWLEDGE

”

“ Knowledge who are driven by
INNOVATIVE IDEAS & CREATIVITY in work ”

In a relatively short span of time URC Infotec, has established itself as a vendor of choice for organizations looking for a complete enterprise resource planning solution which is easy to configure & implement and also user-friendly. Backed by a leading construction and infrastructure company with a 50-year history, we have gained tremendous real-world and real-time insights into the challenges faced by growing businesses. These are articulated in the solutions that effectively address the unique needs of our clients. Our teams of professionals are a combination of experience and expertise with industry specific domain knowledge and are driven by zeal to excel. Needless to say, the solutions developed by this team are practical, comprehensive and targeted to meet customer demands.

Making Changes
Positive

“

It allows greater insight to act on information collated on supply chain and sales from across vendors and customers

”

01. Easy to implement and simple to configure

We offer the ability to meet changing business needs without disrupting the organizational operations. We help leverage the existing IT investments to utilize the IT budget optimally. Our solutions are built on an IT architecture which is conducive for seamless integration with existing enterprise software whilst still maintaining process integrity. Additionally, the products have features that allow the customer to configure a variety of processes to suit their style of functioning.

02. Simple and productive

URCI ESS simplifies the routine tasks and places information in a manner that makes it easy to manage and control. Individual modules are tailored to suit the needs of the profile of people using them across disciplines that include Finance & Accounting, Purchase, Marketing and Human resources. This integrated approach gives the employees the freedom to focus on their key performance area with enhanced productivity and propel the organization ahead.

03. From business insight to action

Our ESS delivers consistent information and produces management reports for every line of business through standard interfaces. People from different departments can have real-time access to transactions and can analyze and track data from different business processes. This helps in aligning business plans, budgets, with actual results across the organization giving significant control over operations.
